# Michelle C. Funk

Software Development | Research | Communications

### **Profile**

Driven, independent front-end developer of scalable JavaScript (React/Redux) applications, with fierce values around code review, unit testing, and usability, and a strong record of self-directed learning.

Collaborative problem-solver with a proven talent for picking up new technologies and systems quickly, thinking critically, and working closely with colleagues to create elegant solutions that work.

Skilled Researcher and Analyst with a passion for using data to illuminate problems and over 5 years experience and master's-level education in qualitative and quantitative research methods.

# Employment history - development

# Exosite LLC - Minneapolis, MN

## Full-Stack Web Developer (Platform), Mar. 2016 - present

Developed primarily front-end code, working mostly in JavaScript (ReactJS, Redux, Mocha/Chai, NodeJS) to help build, improve, and add features to Exosite's next-generation Internet of Things platform, Murano.

## Support Specialist, Oct. 2015 - Jun 2016

Provided development support to customers using Exosite's IoT platform, Portals, including APIs, scripts, and JavaScript widgets. Was resourced 75% to front-end platform development from March to June.

## GreatBizTools - Minneapolis, MN

#### **Contract Software Engineer**, Jul. 2015 - Aug. 2015

Developed front-end code (JavaScript/jQuery, Django, CSS/Bootstrap 2) for proprietary online training web application in a small team. Adapted open-source threaded messaging package to add email-style messaging feature.

## Specialized job training

## Prime Digital Academy - Bloomington, MN

## Beta Cohort Student, Apr. 2015 - Jul. 2015

Learned key software development skills and principles in immersive 12-week "boot camp" program.

- Created full-stack applications using the MEAN stack and jQuery.
- Participated in solo, paired, and group programming projects
- Engaged in talks on teamwork, project management, QA, & accessibility.

## Projects

- Solo: Create web app to display multi-year data from MN DNR with added context. (AngularJS, JavaScript, AJAX, Leaflet)
- **Group**: Add results list and interactive functionality to a property search results map to improve user experience (*Google Maps API, JavaScript, jQuery*)
